

Araiz Ahmad

AI/ML Engineer

Lahore, Punjab +92-334-0496675 araizahmed007@gmail.com [linkedin.com/in/araizahmad](https://www.linkedin.com/in/araizahmad) [Website-portfolio](#) [Github](#)

WORK EXPERIENCE

- **Techverx, Lahore, Pakistan – AI/ML-Engineer** Feb 2025 – Present
 - Developing and deploying end-to-end AI applications using chatbots, FastAPIs, RAG pipelines, and machine learning models.
 - Working with databases and integrating scalable backend systems to support intelligent applications.
 - Writing clear technical documentation and collaborating across teams to ensure smooth product delivery.
- **NexPred Solutions, Lahore, Pakistan – Jr. ML-Engineer** June 2024 – Feb 2025
 - Developing and training models for image and video analysis using nvidia jetson devices
 - Collaborating and leading teams on AI projects.
 - Solving complex problems by developing efficient coding logic and algorithms.
 - Researching to stay updated with the latest AI advancements and training interns.
- **Horizon Tech Services, Islamabad – AI-Engineer Intern (Paid)** Nov 2023 – June 2024
 - Crafted innovative AI solutions by diving deep into research and development, applying the latest AI models to solve complex problems. Further information advised to be kept confidential under an NDA
 - Tested & Deployed ML models (on a desktop-based application)
- **10 pearls, Islamabad, Pakistan – FYP Accelerator Program** Oct 2023 – May 2024
 - Worked on our final year project (PhysioCare) under an industry mentor
 - Learned industry workflows and implementation and used advance computer vision techniques

EDUCATION

- **Air University, Islamabad, Pakistan** Sept 2020 – July 2024
Bachelor of Science in Artificial Intelligence - CGPA: 3.16/4.00
- **Beaconhouse School System, Lahore, Pakistan** Sept 2006 – August 2018
Early Education and GCSE O-LEVELS (Science)

SKILLS

- Python, Linux, Git, PostgreSQL
- Machine learning, Deep Learning, Computer Vision, NLP, RAGs, GenerativeAI, FastAPI, AI Agents
- TensorFlow, Tkinter, Streamlit, HuggingFace, Langchain

PROJECTS

- **Agentic Chatbot Application:** Built an autonomous agent-based chatbot using LangGraph and FastAPI capable of retrieving data from documents and SQL databases, coordinating tools and memory for dynamic, context-aware responses.
- **AI-chatbot:** A dynamic RAG-based chatbot for websites using LangGraph, FastAPI, PostgreSQL, and LangChain. Supports real-time interactions with changing documents, prompts, and LLMs.
- **Human Face Analysis:** Real-time facial behavior analysis system that tracks and interprets eye movements, head tilts, lip activity, and maintains consistent user identity.
- **AniCare:** A RAG-based application using LangChain, LLMs, and FAISS to enable conversational interaction with a veterinarian knowledge base.
- **PhysioCare:** Exercise pose correction system using computer vision (MediaPipe) with 90%+ accuracy. *(Final Year Project)*
- **Factify:** Fake news detection platform by fine-tuning a large language model (LLM) on multi-class labeled data.
- **Bank Transactions Classifier:** NLP classification of bank transactions into categories using TF-IDF and Logistic Regression.
- **Sign Language to Speech:** Real-time translation of hand signs into text using computer vision and machine learning.

CERTIFICATIONS AND COURSES

- Deep Learning Specialization – Deeplearning.AI (Grade: 89.8%)
- Machine Learning Specialization (2/3) – Deeplearning.AI (Grade: 100%)
- Python for Data Science, AI & Development – IBM (Grade: 80%)

ACTIVITIES AND AWARDS

- Conducted workshops AI and filmmaking; mentored students in a 4-week AI training at university.
- Led teams as Head Boy and Media Club President; passionate about filmmaking (9 films), debating (7 wins), poetry, and startups, while actively mentoring and conducting tech sessions at work.
